Pack Quality Control

Monitor and control quality from grower to retailer

- Q Simple and quick so frees inspectors for other tasks
- Q Avoid potentially expensive errors as Q-SYS compares pack, box end and pallet bar codes; checks date codes and box end colours; displays product or label layout with pictures
- Q Staff are guided through checks, results are highlighted in colour and compared to specification automatically
- Q Instant warning of problems with your own messages in any language
- Q Managers can USE information, with reports, graphs and statistical analyses
- Q Managers can be in contact with events from anywhere on site.
- Q Complete traceability from grower to final pack at the press of a key

Pack Quality Control

Q-SYS replaces paper records with a fast, easy to use computer based system

BENEFITS

Benefits in quality, traceability, labour savings and customer satisfaction will be achieved.

SPECIFICATIONS

A complete, electronic product specification sub-system "drives" Q-SYS:

- ✓ Staff are prompted to carry out the correct checks
- ✓ The order that checks are listed on-screen can be configured
- ✓ Staff are warned if a specification has recently changed
- ✓ Results are highlighted in colour and instruction messages displayed

TRACEABILITY

At the press of a key, Q-SYS provides instant traceability from the grower's field/ plot right through to final pack.

CUSTOMER AUDITS

During customer visits, you can show just those inspections that relate to that customer's products. Pinpoint grower, packhouse and shelf life issues at a glance.

HARDWARE

Q-SYS runs on standard Windows hardware with options for touch screen PCs and wireless tablet devices.

Data can be obtained directly from instruments such as temperature probes, O² Analysers and weigh scales to minimise keyboard input and errors.

SECURITY

A complete audit trail tracks all entries and the users who made them.

A hierarchical passcode system means different levels of access can be allowed according to user group.

CONFIGURATION

Q-SYS is configured and installed by Clyde Computing to ensure a quick and efficient implementation plus a fast return on your investment.

TRAINING

New members of staff learn to carry out inspections in a few minutes... no language barriers as you just press on-screen buttons, no keyboard skills are required either.

TRAINING

Clyde Computing provide comprehensive training sessions to cover all other aspects of Q-SYS.

REPORTING

Find non-conforming product, goods inwards rejections, grower non-conformances, final pack failures, product-date code batches... whatever you need to know, in seconds.

Fast data filtering and no restrictions on design gives maximum flexibility.

You can output to paper, PDF files, email, fax and export your data to other systems.

Q-SYS Core

Q-SYS is so easy to use because core features work consistently across the whole system

DATA SHARING

Key information such as products and materials, processes, customers, suppliers, tests/ quality checks and users are defined just once and used in all Q-SYS modules.

EASE OF USE

Consistent and simple menus, buttons and keyboard shortcuts make the system easy and quick to use, whether in the laboratory, factory or office.

FINDING YOUR DATA EASILY

The built-in query option allows users to locate the information they need. The *Quick Find* facility makes this even easier by giving instant access to frequently accessed information at the press of a key.

SECURITY

A hierarchical passcode system means different levels of access are allowed according to each member of staff's user group.

- ✓ Passcodes are required to access the system and to perform key operations.

LICENSING

Q-SYS is licensed according to the number of concurrent users, you can install on as many PCs as you like.

- ✓ Lower-cost "view-only" licences are available for those staff who just need to view information on screen, output to spreadsheets or print reports.

FLEXIBLE REPORTING

Integrated report designer allows printed reports to be designed in any format. You don't need to purchase or learn to use any other reporting tools.

SPREADSHEETS

The built-in export facility allows easy export of Q-SYS information to Microsoft Excel™ spreadsheets or for graphing.

PDF, EMAIL & FAX

PDF reporting, email and fax are built in, no need to purchase any other software or learn to use any other reporting tools.

Emails are routed directly to your mail server and don't need a mail client (Microsoft Outlook, IBM Notes, Groupwise etc.) to be installed.

Faxing takes place through your organisation's Windows fax server.

All this means that automated report creation and sending routines can be set up, and run unattended.

Why Q-SYS?

"Finding results, data trending and generating reports is quick and easy to do"

"It's enabled us to increase throughput without increasing staff... there is a definite payback..."

"Clyde understand our problems; they have a lot of experience..."

"The time it saves me is remarkable..."

"Enquiries and problems are dealt with by Clyde Computing quickly and in a friendly manner"

STREAMLINE YOUR OPERATION

- ✓ Q-SYS is a secure, paperless system
- ✓ Streamlines working methods
- ✓ View information anywhere on site
- ✓ Control positive release
- ✓ Satisfy auditors

QUALITY IMPROVEMENT

- ✓ Q-SYS warns of quality problems as soon as they arise
- ✓ Allows prompt action to reduce down-time and product losses and re-packing
- ✓ Q-SYS packaging checks avoid expensive errors
- ✓ Pack, Tray and Pallet bar codes are automatically compared
- ✓ Pictures show clearly what packaging is correct
- ✓ Date codes dates automatically checked
- ✓ Q-SYS enables you to adapt QA testing regime to suit confidence levels

TIME-SAVING

- ✓ Recording of test results is quicker than paper-based systems
- ✓ Transcription onto reports is no longer necessary, eliminating possible errors
- ✓ Automatic comparison with specs is made, leading to fewer mistakes

RAPID MANAGEMENT INFORMATION

- ✓ Q-SYS provides exception reports and statistical analyses allowing managers to USE the information available
- ✓ Data can be easily reviewed for corrective and preventive actions to be put in place
- ✓ Reduces costs as there's no need to re-design, print and control Quality Department forms. In fact you don't need any forms!

CUSTOMERS

- ✓ You can instantly review data for particular customers during audits and visits
- ✓ Your customers and potential customers will be impressed
- ✓ Q-SYS helps to retain and expand your business
- ✓ You can move to electronic, paperless reporting

SUPPLIERS

- ✓ Monitor supplier performance
- ✓ Use in commercial negotiations with suppliers
