Weight Control Quality Logging

The ideal solution for weight control and quality attribute checking

- Q Simple and quick to use
- Q Product recognition by barcode scan
- Q Prompts operators how many packs to weigh
- Q Unlimited quality attribute checks can be recorded
- Q Highlights out of specification results and gives warnings
- Q Minimises 'give-away' and downtime
- Q Ensures adherence to Weights and Measures etc.
- Q Deals with minimum and catch weight products too
- Q Provides full production batch traceability
- Q System can be managed from any location on site

Weight Control Quality Logging

Q-SYS Quality Logging eliminates the need to keep paper records

PRODUCTION CONTROL

Designed to allow increasingly complex quality attribute and HACCP checks to be recorded in real time.

TRACEABILITY

Full production batch traceability ensures that any material/ ingredient batch can be traced to any intermediate or final product. All incoming raw materials and ingredients can be recorded with supplier, quantity and batch information.

- ✓ Ensures that only released batches of ingredients and materials are used.

SPECIFICATIONS

A complete, electronic product specification sub-system "drives" Q-SYS:

- ✓ Staff are prompted to carry out the correct checks
- ✓ The correct number of packs are weighed
- ✓ Staff are warned if a specification has recently changed
- ✓ Results are highlighted and messages displayed
- ✓ T1 and T2 actions are enforced

HARDWARE

Q-SYS runs on standard Windows hardware with options for touch screen PCs and wireless tablet devices.

- ✓ All system management can be undertaken from any location on site and automatic messaging informs remote staff of any problems.

REPORTING

Professional quality reports and analyses by run, product, customer etc. are easily generated.

TRAINING

Users are trained to carry out inspections in a few minutes.

Clyde Computing provide comprehensive training sessions to cover all other aspects of Q-SYS.

SECURITY

A complete audit trail tracks all entries and the users who made them.

Details of unusual events or messages encountered by staff during production are automatically logged.

Hierarchical passcode system means different levels of access can be allowed according to user group.

All data is stored for as long as is needed.

Q-SYS Core

Q-SYS is so easy to use because core features work consistently across the whole system

DATA SHARING

Key information such as products and materials, processes, customers, suppliers, tests/ quality checks and users are defined just once and used in all Q-SYS modules.

EASE OF USE

Consistent and simple menus, buttons and keyboard shortcuts make the system easy and quick to use, whether in the laboratory, factory or office.

FINDING YOUR DATA EASILY

The built-in query option allows users to locate the information they need. The *Quick Find* facility makes this even easier by giving instant access to frequently accessed information at the press of a key.

SECURITY

A hierarchical passcode system means different levels of access are allowed according to each member of staff's user group.

- ✓ Passcodes are required to access the system and to perform key operations.

LICENSING

Q-SYS is licensed according to the number of concurrent users, you can install on as many PCs as you like.

- ✓ Lower-cost "view-only" licences are available for those staff who just need to view information on screen, output to spreadsheets or print reports.

FLEXIBLE REPORTING

Integrated report designer allows printed reports to be designed in any format. You don't need to purchase or learn to use any other reporting tools.

SPREADSHEETS

The built-in export facility allows easy export of Q-SYS information to Microsoft Excel™ spreadsheets or for graphing.

PDF, EMAIL & FAX

PDF reporting, email and fax are built in, no need to purchase any other software or learn to use any other reporting tools.

Emails are routed directly to your mail server and don't need a mail client (Microsoft Outlook, IBM Notes, Groupwise etc.) to be installed.

Faxing takes place through your organisation's Windows fax server.

All this means that automated report creation and sending routines can be set up, and run unattended.

Why Q-SYS?

"Finding results, data trending and generating reports is quick and easy to do"

"It's enabled us to increase throughput without increasing staff... there is a definite payback..."

"Clyde understand our problems; they have a lot of experience..."

"The time it saves me is remarkable..."

"Enquiries and problems are dealt with by Clyde Computing quickly and in a friendly manner"

STREAMLINE YOUR OPERATION

- ✓ Q-SYS is a secure, paperless system
- ✓ Streamlines working methods
- ✓ View information anywhere on site
- ✓ Control positive release
- ✓ Satisfy auditors

QUALITY IMPROVEMENT

- ✓ Q-SYS warns of quality problems as soon as they arise
- ✓ Allows prompt action to reduce down-time and product losses and re-packing
- ✓ Q-SYS packaging checks avoid expensive errors
- ✓ Pack, Tray and Pallet bar codes are automatically compared
- ✓ Pictures show clearly what packaging is correct
- ✓ Date codes dates automatically checked
- ✓ Q-SYS enables you to adapt QA testing regime to suit confidence levels

TIME-SAVING

- ✓ Recording of test results is quicker than paper-based systems
- ✓ Transcription onto reports is no longer necessary, eliminating possible errors
- ✓ Automatic comparison with specs is made, leading to fewer mistakes

RAPID MANAGEMENT INFORMATION

- ✓ Q-SYS provides exception reports and statistical analyses allowing managers to USE the information available
- ✓ Data can be easily reviewed for corrective and preventive actions to be put in place
- ✓ Reduces costs as there's no need to re-design, print and control Quality Department forms. In fact you don't need any forms!

CUSTOMERS

- ✓ You can instantly review data for particular customers during audits and visits
- ✓ Your customers and potential customers will be impressed
- ✓ Q-SYS helps to retain and expand your business
- ✓ You can move to electronic, paperless reporting

SUPPLIERS

- ✓ Monitor supplier performance
- ✓ Use in commercial negotiations with suppliers
